EDUCATION

Sathyabama Institute of Science and Technology

Chennai, India

BE-CSE CGPA:9.05

2020 - 2024

Vignan Co-operative Junior College

Guntur, India

12th, State Board of Andhra Pradesh, Percentage : 97%

2018 - 2020

TECHNICAL SKILLS

Languages & Backend: Python, PostgreSQL, Flask, FastAPI, Redis, Docker

Agentic & LLM Stack: AI Agents, Agentic RAG, Pydantic AI, LangChain, LangGraph, RAG,

Evaluation & Monitoring: LangSmith, LangWatch, LangFuse

Prompting: Prompt Engineering, Contextual Engineering, DSPy

Protocols: Model Context Protocol (MCP)

Cloud Platforms: AWS, Azure

Developer Tools: Git, GitHub, Cursor, Claude Code, Postman

WORK EXPERIENCE

❖ Software Developer at Bitcot Technologies, Chennai

Dec-2024 - present

- Built a **multi-agent healthcare automation platform** using LangGraph, LangChain, and AWS Lambda, with MCP-based dynamic tool discovery and autonomous workflow orchestration across patient, practitioner, and admin personas.
- Implemented AI-powered healthcare workflows—symptom triage, scheduling, referrals, and treatment recommendations—backed by DynamoDB single-table design.
- Developed **real-time voice-to-voice conversational AI** using OpenAI Realtime API with memory-augmented conversations via Mem0AI/LangMem.
- Established a comprehensive **AI quality assurance framework** using **LangSmith** (evaluation, trace debugging), LangFuse (observability), pytest, and SonarQube for continuous reliability and performance monitoring.
- Developed an **empathetic healthcare chatbot** for cancer patients with multimodal test guidance, workflow explanations, and video-based educational support.
- Implemented **emotion-aware response generation** to improve patient communication quality and reduce anxiety.
- Automated **end-to-end Jira release-note generation**, integrating ticket data, branches, deployments, and service logs to eliminate manual operations.
- Reduced release-note preparation time from **hours to minutes** through structured auto-assembly of features, updates, impacts, deployment steps, and validations.

INTERSHIPS

❖ Research And Development Intern on AI and ML at Genpact, Bengaluru

Jan-2024 - jun2024

- Developed a Dynamic Document Answering System using LLMs using Python, Flask,
- Implemented LLMs for intelligent question-answering, enhancing user interaction and data retrieval.
- Created a user-friendly interface and ensured robust backend integration, optimizing performance and reliability.

❖ Intern at HCL Tech, Chennai

Jan-2023 - May-2023

- During the internship my task and responsibility is to work on "**voice emotion detection**", perform Data analysis and built ML model for prediction
- The objective of the voice emotion detection project is to develop a system that can accurately analyze and detect emotions in human voices.
